

GEONEX CLAMPS

GEONEX CLAMPS FOR BETTER CONTROLLING OF THE PILE PIPE DURING DRILLING

GEONEX Clamps enable better controlling of pile pipe during drilling. This is needed especially in difficult ground conditions and special situations. Clamps can be also equipped with tool break out drill rod connections. Clamp set also insures that pipe is correctly aligned to rotary head.

APPLICATIONS FOR GEONEX CLAMPS

✓ DTH-hammer piling

The Geonex Clamps can be used to drill piling for DTH-hammers.

✓ Interlocking pipe walls

The Clamps are used for drilling interlocking pipe walls.

✓ Pipe handling

The Geonex Clamps make pile pipe controlling easier and better during drilling.

TECHNICAL INFORMATION

GEONEX Clamps

Gripping diameter range mm (in)	140-1220 (5,5" - 48")
OPTIONS	Hydraulic back rest
OPTIONS	Additional hydraulic rear roller rest
OPTIONS	Drill rod opening cylinder and with accessories to open rod connections
