

GEONEX DTH HAMMERS

DOWN THE HOLE -HAMMERS UP TO 34"

Down The Hole -hammers are produced from latest technology and high quality materials under strict quality control. The mark series Down The Hole -hammers are valveless design with efficient and powerful impact energy, and are your best partner to work with hard rock. They can be operated over a wide range of air pressures. Each hammer has a designed hole drilling size range.

APPLICATIONS FOR GEONEX DTH HAMMERS

✓ Horizontal Drilling

The Geonex Down The Hole -hammers are optimal for horizontal drilling.

✓ Foundation, piling and Anchoring

The DTH-hammers can be ordered with different type of shanks according to customer needs.

✓ Civil engineering

With DTH Hammers, piles are installed without the need to disturb surfaces, structures or other preexisting services.
